DETAILED ACTION

EXAMINER'S AMENDMENT

1. The Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Gregory C. Bays on October 2, 2006.

IN THE CLAIMS

- a) Claim 19 line 3, change "a pair of legs" to --the pair of legs--.
- b) Claim 20 line 1, change the dependency from "18" to --19--.
- c) Claim 26 line 1-2, after "legs" insert --of the grounding bar--.
- d) Claim 28 line 3, change "a pair of legs" to --the pair of legs--.

Allowable Subject Matter

2. Claims 1-14 and 16-34 are allowed.

The following is an examiner's statement of reasons for allowance: The primary reasons for the indication of the allowability of claims 1-14 and 16-34 are:

Regarding claims 1-10 the prior art does not teach or fairly suggest in combination with the other claimed limitations a pedestal having a lock mechanism including a latch supported in a lock housing for movement between locked and unlocked positions; and a first lock receptacle arranged on the base section for receiving the lock mechanism when the cover is engaged with the base section and the

lock mechanism is arranged near the bottom of the cover and a second lock receptacle arranged on the bracket system for receiving the lock mechanism when the cover is engaged with the base section and the lock mechanism is arranged near the top of the cover; each of the first and second lock receptacles defining a pocket for supporting the lock housing and being engageable with the latch when the latch is the locked position so as to prevent disengagement of the cover from the base section.

Regarding claims 11-14, 16 and 17, the prior art does not teach or fairly suggest in combination with the other claimed limitation a pedestal enclosure comprising a base section having a generally rectangular configuration and a cover having a generally cylindrical configuration with a generally circular cross-sectional shape, the cover being engageable with a cylindrical neck on the base section so as to define an interior space.

Regarding claims 18-26, the prior art does not teach or fairly suggest in combination with the other claimed limitations of a pedestal enclosure comprising a grounding bar including a pair of legs, each leg including a connecting portion that inserts into and snap engages with a respective corresponding slots in the legs of the bracket system.

Regarding claims 27-33 the prior art does not teach or fairly suggest in combination with the other claimed limitations a pedestal having a splice bar pivotably supported between the legs of the bracket system for movement between an locked position wherein a hook at each end of the splice bar engages a respective one of the legs of the bracket system and an unlocked position wherein the splice bar is disengaged from the legs of the bracket system.

Regarding claim 34, the prior art does not teach or fairly suggest in combination with the other claimed limitations a pedestal enclosure comprising a base section having a generally rectangular configuration and a cover having a generally cylindrical configuration with a generally circular cross-sectional shape, the cover being engageable with a cylindrical neck on the base section so as to define an interior space and a detachable wire service channel for receiving one or more wires having a flange for snap engagement with a plurality of tabs on an inside surface of the base section.

These limitations are found in claims 1-14 and 16-34, and are neither disclosed nor taught by the prior art of record, alone or in combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

3. Applicant's arguments filed July 13, 2006 have been fully considered and they are persuasive.

In response to the applicants argument the Examiner agrees that neither Frazier (US 6,598,949) nor the cited prior art teach, disclose or suggest a pedestal enclosure comprising a base section having a generally rectangular configuration and a cover having a generally cylindrical configuration with a generally circular cross-sectional shape, the cover being engageable with a cylindrical neck on the base section so as to define an interior space.
